Honorable Mayor and City Council
City of Peachtree City
151 Willowbend Road
Peachtree City, Georgia 30269

Dear Mayor and Members of Council:

In accordance with sound fiscal management practices and requirements of the State of Georgia and the City Charter and Code of Ordinances of Peachtree City, I hereby submit the City Manager's proposed City of Peachtree City FY 2014 operating budget.

A Planning Document and a Fiscal Planning Process

The purpose of this budget is to present in numeric terms, a proposed FY 2014 financial plan for the City of Peachtree City. A municipal budget can be defined as *a proposed plan for the raising and spending of money for specific programs, functions, activities or objectives during the fiscal year*. The adopted budget, after having gone through an analysis of the city's needs, serves as the city's strategic financial planning document. The proposed FY 2014 budget has as its major goal the provision of sound fiscal management with a strong focus on long range financial planning. During the past five or more years we have gone through perilous economic times. Now with signs that the economy may be rebounding we must still remain vigilant.

As we are all aware, immediate economic conditions must be dealt with while simultaneously focusing on the long-range financial condition of the city. This proposed budget is intended to reflect the results from numerous discussions with and between Council and staff. As most local governments are experiencing budget difficulties for various reasons, the fact is that contemporary budget preparation and adoption is a trying process and most everyone involved in this process acknowledges that it requires complicated decisions. These decisions have an affect on the operations of the city, stretch our capacity and require extensive prioritization, but all with one goal of bringing the staff and council together in order to assure the long term vitality of the city.

An Overview: Factors Impacting the FY 2014 Budget

In previous years, in response to a slipping economy and potential revenue impacts, Council took an aggressive approach to head off future fiscal concerns by passing a millage rate increase of 1.25 mils in FY 2011 and a 0.372 millage roll up in FY 2013. These actions were in addition to expense cuts, outsourcing, downsizing and other adjustments. Additionally, the city has a progressive and forward thinking policy on the

maintenance of reserves. The city's current policy is to maintain a minimum uncommitted of 20% of the general fund's total use of funds . The balance is currently projected to end FY 2013 at \$9,840,240 (34%).

The above actions have allowed the city to retain its AAA financial rating; a recognition by independent rating agencies of the city's sound financial and operational management.

The proposed FY 2014 budget represents the results of prudent financial management that have helped create for the city a sound financial posture. The city took remedial actions to adjust to the fiscal impacts at the height of the fiscal downturn. During the previous budget years, the city used a combination of approaches to address fiscal and operational concerns including but not limited to expense cuts, downsizing, outsourcing, freezing positions, suspending merit and COLA raises, millage rate adjustments, and reorganization.

Revenue and Millage Projections

For FY 2014, there are three major factors that have impacted our approach to the preparation of this budget proposal. One factor is that the 1% Special Purpose Local Option Sales Tax (SPLOST) that was in effect from 2005 through 2010 was not renewed by Fayette County voters in 2009. Peachtree City shared in that revenue source and had been receiving approximately \$2M per year during the five-year period. This tax was used for transportation projects, including resurfacing of streets and recreational paths as well as numerous other infrastructure improvements. These funds are essentially gone; funds that must be replaced in order to maintain the city streets, cart paths, bridges and tunnels.

Five options for potential revenue replacements were taken into account in developing this proposal:

- (a) Fayette County Commissions proposal to place a SPLOST on the ballot in November 2013 which, if approved, could provide over \$12,000,000 in revenue to be used over a five to seven year period.
- (b) A vote by Peachtree City citizens in 2015 for a General Obligation Bond (GOB) in an amount sufficient to fund the city's street and cart path needs for a five-seven year period.
- (b) Transfer funds from General Fund Reserves to partially cover FY 2014 street and cart path expenses.
- (c) Property tax/mileage increase.
- (d) Reduce service levels across the total city operations.

After identifying the options we focused on options (a), (b) and (c) in accordance with the city's adopted financial policies to maintain service levels. In simple terms a SPLOST would be the first choice, however if the vote (if any) fails then we would propose a GO Bond referendum for Peachtree City voters in FY 2015. If the GOB issue were to fail then the maintenance and operation millage rate might need to be adjusted in order to fund street and path maintenance in the General Fund. In the interim, and for purposes of crafting this budget, road and path expenditures have been budgeted in the General Fund operating budget in the amount of \$958,000.

The second major factor has to do with the renegotiations of the shared 1% Local Option Sales Tax (LOST). This is another county-wide shared tax, and the share received by each jurisdiction has traditionally been determined, in large part, by each jurisdictions percentage of the total county population, however the legislature has determined that population is not the dominate factor and must be considered along with seven other factors. Even with these items factored into the process population was still important and other jurisdictions within the county showed increases in the 2010 US Census. Therefore, we had predicted that Peachtree City might have an annual decrease in LOST revenues. Negotiations were successful in that the cities and county cooperated in agreeing to a ten year phase-in designed to minimize the impact of our percentage shift; meaning that Peachtree City had a reduction from a 33.45% to the current 31.7%. However, even with conservative estimates there is enough information to indicate that there will be a future sustainable up-tick in this revenue stream.

The third factor was the issue of previous declines in the tax digest and whether these declines were continuing, stabilizing or growing. While declines in Peachtree City had not been as great as in other areas of Fayette County it was a concern to maintaining the quality of life in our city. From all the records and indicators we have seen tax digest values of properties in the city seem to have stabilized, with no predictions of further decline at this time, but also no significant growth. The Five Year Financial Model had projected a 0% change in tax digest values for FY 2014 and the projection now appears to be on target. Needless to say, stability of the tax digest is an issue which will need continuous vigilance.

Expense Challenges

Peachtree City is not unlike many communities that have high goals and standards. We constantly strive to keep up with the demand for upkeep and maintenance of city facilities and other infrastructure such as public parks, medians, parks, plazas, etc. Separate schedules are under development that will demonstrate specific maintenance needs and projected schedules. These will be something new for Peachtree City and will provide management with a metric oriented approach, rather than just catch up. Staff has worked hard on these schedules and it is truly eye opening to witness the diversity and scope of city facilities and required maintenance items.

As we proceed further with technology upgrades it becomes evident that this is one of the organizations main support activities. Our upgrades will continue in FY 2014 in both hardware and software. What was appropriate ten or twelve years ago is no longer able to meet current and projected organizational needs

Focus on Infrastructure

A focus on the City's infrastructure, neglected throughout the recession, will continue to be a major part of the capital programs for FY 2014 and beyond. To that end, we would recommend that the city issue another public facilities bond estimated at \$2,500,000 for continued city buildings and infrastructure needs.

Another major initiative is to continue to gain efficiencies through organizational performance and revision of city personnel policies. Ultimately, the goal is to continue to maintain or improve service levels enjoyed by our citizens through a cooperative or matrix management process. We are confident that the budget submitted is designed to achieve these goals, and will result in more effective and efficient operations throughout the city in the coming year and years ahead.

A Short Summary of the Proposed Budget – the Highlights

Major issues that needed to be addressed in this budget and areas that needed significant attention have been discussed in previous sections. Following is a synopsis of the most import actions included in this proposed budget.

- The proposed General Fund Budget for FY 2014 totals \$29,583,735. This number represents an increase of only 1.74% over the current FY2 013 General Fund Budget. This includes an addition of \$958,000 to the General Fund budget for street and cart path upkeep due to the loss of SPLOST funding.
- The proposal reflects no increase in the total millage rate, rather a decrease of 1.2%.
- A \$2.5 million Facilities Bond is included for continued city buildings and other infrastructure needs.
- As indicated earlier the city's technology is in the process of being upgraded and this will continue with the completion of (a) the final phase of hardware implementation, and (b) software upgrades for the Police, Human Resources and Finance Departments, and (c) increased availability of information and services through the city's website.
- On an accounting sheet, employees are numbered in the liability section. In reality, they are the city's primary assets. All the equipment in the world could

not get the services to the citizens without dedicated and competent employees. Peachtree City is fortunate to have employees of high caliber who provide quality services. I am pleased to recommend that City of Peachtree City employees be granted a 2% cost of living adjustment.

- The city is sadly behind on its pay and classification program, thus we have included funding for a comprehensive pay/classification study. No implementation costs are included as that would be a decision that would have to be reached at the conclusion of the study.
- On the personnel complement, one new position is proposed in the Fire Department to serve as a civilian Logistics Specialist, similar to the Quartermaster in the Police Department.
- Any other changes in personnel in the Police and Fire Departments will be determined following the completion of the ongoing MATRIX Co. study.

Other Recommendations and Comments

This budget represents a meaningful work program for the City - one that can be accomplished by all of us working together. All of us who call Peachtree City home know that we will need to seek new and better ways to maintain our quality of life while maintaining a sense of sustainability.

As is my custom, I would like to offer a few closing suggestions for your continuing consideration.

- That the City examine all opportunities to reduce costs and the utility of marginal programs
- That the City maintains constant vigilance on the tax base and revenues to ascertain adequacy
- Review all fees collected by the City of Peachtree City
- That the City Council and staff continue with their efforts at strategic planning
- That the City (staff, Council and citizens collectively) continue to work with the Fayette County Development Authority to focus on economic development and aggressively seek industrial, commercial and office complex development within the corporate limits. This development must be compatible with the quality of life in Peachtree City and at the same time provide a significant contribution to the City's economic and financial base.

- That it is clearly understood that the City's infrastructure (buildings, recreation facilities, cart paths, streets, etc.) is the lifeline of its citizens and an important ingredient in protecting our high quality of life
- That any new programs and contributions to non-City operations or programs be carefully reviewed for precedence and impact on future budgets as well as the current budget

This budget is recommended to the City Council after many hours of discussion and debate and I believe it represents a significant plan for the city's operations in FY 2014, and accomplishing our goals. It is my firm belief that with proper planning and management, Peachtree City's future can be one of excitement. Together, the City Council, City Manager, staff and citizens will take the necessary and appropriate steps to insure that Peachtree City remains as a dynamic and livable community. I look forward to the discussion and debate of this fiscal plan during the Council's budget workshops and sharing with you the difficulties in making these recommendations.

Finally, I wish to extend my special thanks to Financial Services Director Paul Salvatore for all of his in-depth analysis and recommendations in preparing this proposed budget. I would also like to thank the Finance staff, and all our division heads and their staffs, for their assistance in preparing this proposal. Most importantly, to all the city employees who will carry out this financial plan.

Respectfully submitted,

James L. Pennington, EdD
